

JAVIER PÉREZ URRUTIA

SOFTWARE ENGINEER — FRONTEND, MOBILE & SYSTEMS

Tokyo, Japan | j.perezurrutia@gmail.com | github.com/peladno | linkedin.com/in/javier-perez-u | Portfolio: peladno.dev

PROFESSIONAL SUMMARY

Software Engineer with a strong foundation in low-level systems programming (C/UNIX) from 42 Tokyo, combined with hands-on professional experience in cross-platform mobile development (React Native) and web applications (TypeScript, Node.js, React). Known for clean code architecture, discipline, and structured problem-solving refined through professional culinary arts before transitioning into software development.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript (ES6+), C, Python 3, SQL, HTML5/CSS3
Frameworks & Libs:	React Native, React, Redux, Node.js, Express, Astro, Tailwind CSS
Architecture & Testing:	Hexagonal Architecture, RESTful APIs, Prim's / BFS Algorithms, Pytest, Jest
Tools & Platforms:	Git, GitHub, PostgreSQL, Docker, Linux / UNIX Shell, Poetry, Jira, Scrum
Languages (Human):	Spanish (Native), English (Professional), Japanese (Conversational / JLPT N3)

PROFESSIONAL EXPERIENCE

Mobile Application Developer

03/2023 — 03/2024

Unity SPA | Remote

- Developed, tested, and maintained cross-platform mobile features for the 'MINT' application using React Native and Redux.
- Integrated RESTful backend APIs, managed asynchronous global state, and optimized UI responsiveness across iOS and Android.
- Performed debugging, performance profiling, and refactored codebase for modularity and maintainability.

Frontend Developer

12/2022 — 02/2023

DevSafio Incubator | Remote

- Engineered reusable UI component architecture for a web employment platform tailored for junior developers using React and JavaScript.
- Participated in agile Scrum workflow, leading component code reviews and collaborating through Jira and Git.

FEATURED PROJECTS

Shared Calendar API (Hexagonal Architecture)

Node.js, Express, TypeScript, PostgreSQL

- Built a robust backend API adopting Hexagonal Architecture (Ports and Adapters) to ensure complete decoupled domain logic.
- Configured PostgreSQL database models, repository adapters, and RESTful endpoints for multi-user calendar event synchronization.

A-Maze-ing (Maze Generator & Solver)

Python 3.10+, Pytest, Poetry, Terminal ASCII

- Implemented Prim's algorithm for 2D perfect and braided maze generation with bitmask wall serialization (4-bit hexadecimal format).
- Applied Breadth-First Search (BFS) for optimal shortest-path solving with an interactive terminal ASCII visualization UI and Pytest suite.

EDUCATION & CERTIFICATIONS

Software Engineering Curriculum (Peer-to-Peer)

04/2026 — Present

42 Tokyo | Tokyo, Japan

- Intensive low-level systems programming in C (memory management, pointer arithmetic, UNIX primitives) and Python scripting.

Certified Web & React JS Developer

Completed

Coderhouse Certification

- Certified in Modern JavaScript (ES6+), React JS Component Lifecycle, State Management, and Web Development.
